Date: Monday, October 1\textsuperscript{st}, 2012  
12:00 PM – 1:00 PM

Title: “Angiotensin multitasking in the brain: eating, drinking, and stress responding”

Speaker: Eric G. Krause, Ph.D.  
Assistant Professor, Department of Pharmacodynamics  
College of Pharmacy, University of Florida

Dr. Krause has disclosed no relevant financial relationships. No one else in a position to control the content of this activity has any financial relationship(s) to disclose.

Learning Objectives: The participants should be able to define and identify brain nuclei that are responsive to angiotensin II. The participants should be able to evaluate the role that central angiotensin II has in the development of obesity-induced hypertension. The participants should be able to recognize the impact that hydromineral imbalance has on mood disorders.

Location: HPNP Building - Classroom G301  
101 S. Newell Drive  
Gainesville FL 32611

Directions: Classroom is located in the HPNP building on the Ground Floor on the southwest side of the building.
