Date: Monday, October 15th, 2012
12:00 PM – 1:00 PM

Title: “β-Secretase and γ-Secretase Inhibition Cause Retinal Pathology: A cautionary tale in the treatment of Alzheimer’s disease”

Speaker: Michael E. Boulton, Ph.D.
Professor, Department of Anatomy and Cell Biology
College of Medicine, University of Florida

Dr. Boulton has disclosed that he is a consultant for Eli Lilly, Inc. and Amgen, Inc. No one else in a position to control the content of this activity has any financial relationship(s) to disclose.

Learning Objectives: At the conclusion of this presentation, participants should be able to:
1. Define the function of β- and γ-secretase.
2. Define the role of β- and γ-secretase in the retina.
3. Recognize the retinal pathology associated with inhibition of β- and γ-secretase.
4. Identify cellular mechanisms by which secretase inhibition leads to retinal pathology.

Location: HPNP Building - Classroom G301
101 S. Newell Drive
Gainesville FL 32611

Directions: Classroom is on the ground floor of the HPNP building, west of the lobby.

Continuing Education Sponsors:
UF College of Medicine: ***Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. ***Credit: The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
VA: 1.0 hour of Continuing Education credit provided for: VA employees.
