“Metabolic and Bioenergetic Consequences of the Loss of Gonadal Function”

Presented by:

Wendy M. Kohrt, PhD

Professor of Medicine
Division of Geriatrics
University of Colorado, Denver

Monday, January 14th, 2013, from 12:00 PM – 1:00 PM
HPNP Building - Classroom 1101

Classroom is one floor up, on the east side of the HPNP lobby.

Learning Objectives: At the conclusion of this presentation, participants should be able to:

1. Recognize the conceptual role of gonadal aging as a determinant of disease risk.
2. Distinguish the influence of ovarian function on body composition, insulin action, and vascular function.
3. Describe the potential role of gonadal function in the maintenance of energy balance.

Dr. Kohrt has disclosed no relevant financial relationships. No one else in a position to control the content of this activity has any financial relationship(s) to disclose.

Continuing Education Sponsors:

UF College of Medicine: ***Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. ***Credit: The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

VA: 1.0 hour of Continuing Education credit provided for: VA employees.
