“Remodeling of Hepatic Metabolism During Obesity and Insulin Resistance”

Presented by:

Nishanth E. Sunny, PhD

Assistant Professor
Division of Endocrinology, Diabetes & Metabolism
Department of Medicine, University of Florida

Monday, March 25th, 2013, from 12:00 PM – 1:00 PM
HPNP Building - Classroom 1101

Classroom is on the east side of the HPNP lobby and one floor up.

Learning Objectives: At the conclusion of this presentation, participants should be able to:

1. List altered metabolic processes in the liver of an obese and insulin resistant subject.
2. Explain the role of mitochondria in the pathophysiology of obesity, insulin resistance and fatty liver.
3. Define how ‘nutrient overload’ causes alterations in glucose and mitochondrial metabolism in the liver.
4. Evaluate dysfunctional metabolic pathways in the liver which could be targeted for therapeutic interventions.

Dr. Sunny has disclosed no relevant financial relationships. No one else in a position to control the content of this activity has any financial relationship(s) to disclose.

Continuing Education Sponsors:

UF College of Medicine: ***Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

***Credit: The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

VA: 1.0 hour of Continuing Education credit provided for: VA employees.

If you have any questions regarding this seminar or the issuance of CME credits, please contact Lea-An Steiner at 352-265-0111, ext. 85867, or email steiner2@ufl.edu.
