

# Do you have some difficulty with walking, climbing stairs, or doing daily chores?

*You may qualify for the **UPfront Walking Study**.*

*The purpose of this research study is to understand why some older people develop problems with walking. We will examine how mild electrical stimulation of the brain might improve walking function. Some volunteers will be eligible to participate in a 6-week walking therapy program.*

## **This study involves:**

- physical performance tests
- mild electrical stimulation of the brain
- walking therapy for some participants

## **You may qualify if you are:**

- age 65 or older
- have some difficulty with walking, climbing stairs or doing chores.
- willing to participate in a 6-week walking therapy program

Participants are compensated for each qualifying study visit.
