“Cellular Recycling: Role of Autophagy in Aging and Disease”

Presented by
Malene Hansen, Ph.D.
Tuesday, April 2, 2019
12:00 pm to 1:00 pm

UF, Clinical Translational Research Building, 2004 Mowry Rd, Room 2161

Learning Objectives: At the conclusion of this presentation, participants should be able to:

1. Formulate how understanding of molecular mechanisms of aging can be helpful to combat multiple human diseases.
2. Describe how the model organism C. elegans has been useful in understanding conserved pathways and processes that affect organismal aging.
3. Recognize limitations in using steady-state methods to estimate activity of the cellular recycling process autophagy.

Dr. Hansen has disclosed no relevant financial relationships. No one else in a position to control content has any financial relationship(s) to disclose.

CME Information:

Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Credit: The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. The VA designates 1.0 hour of Continuing Education credit provided for its employees.

Series #9185 and #9284 (Zoom livestream: https://ufl.zoom.us/j/8447650802)
