“Targeting Neural Excitability Changes in Aging to Improve Cognition”

Presented by

Jennifer L. Bizon, Ph.D.

Tuesday, April 16, 2019
12:00 pm to 1:00 pm

UF, Clinical Translational Research Building, 2004 Mowry Rd, Room 2161
Lunch provided

Learning Objectives: At the conclusion of this presentation, participants should be able to:
1. Recognize age-associated changes in cognitive flexibility and decision making.
2. Define and describe brain aging changes that contribute to altered excitability.
3. Differentiate among multiple approaches targeting neural excitability to attenuate age-associated cognitive impairment.

Dr. Bizon has disclosed no relevant financial relationships. No one else in a position to control content has any financial relationship(s) to disclose.

CME Information:
Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Credit: The University of Florida College of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. The VA designates 1.0 hour of Continuing Education credit provided for its employees.
