

Request for **Research Education Scholar Applications**
from the University of Florida Claude D. Pepper Older
American's Independence Center (OAIC) Research Education
Core focused on

Promoting Mobility and Independence

Note: this mechanism includes both effort and science

Release Date: September 1, 2022

Full Application due: December 1, 2022

The University of Florida Claude D. Pepper Older American's Independence Center (OAIC) is seeking applications for its Pepper Scholar Program from early-stage investigators conducting research related to the OAIC theme of **promoting mobility and independence**. Investigators with a research program that proposes to integrate new concepts of circadian rhythms or cancer biology with aging and mobility will be prioritized and encouraged but not required. Examples may include time restricted feeding to improve mobility and healthspan with outcomes measures including pain, sleep, physical activity or inflammatory markers.

RFA information workshop

* **September 9, 2022 from 8-9 AM in CTRB 3161**

or via zoom <https://ufl.zoom.us/j/9816351466>

Workshop registration

UF OAIC Cores

Scholars **MUST** utilize select OAIC Cores as a research resource described below in "Research Component". A brief description of each core follows.

The Research Education Core led by Christiaan Leeuwenburgh, PhD and Roger Fillingim, PhD which recruits and supports talented early stage investigators and provides mentored research and personalized training, including a common core of activities that increase the aptitude for translational science.

The Clinical Research Core led by Steven Anton, PhD and Marco Pahor, MD provides the infrastructure and expertise for conducting clinical research across the spectrum of translational investigation.

The Metabolism and Translational Science Core led by Christiaan Leeuwenburgh, PhD in collaboration with all other Cores, utilizes biomarkers to determine specific biological mechanisms of functional decline in elderly populations and in pre-clinical animal models of aging.

The Circadian Rhythms Core led by Karyn Esser, PhD provides resources and expertise for integrating circadian rhythms and circadian clock research design and outcomes measures to both preclinical and clinical studies.

The Biostatistics Core led by Peihua Qiu, PhD supports study design, sample size calculations, randomization, and state-of-the-art statistical analyses of OIAC supported studies. The core also provides data coordination, including developing data collection forms, designing web-based capture systems, and data management.

The Data Science and Applied Technology Core led by Todd Manini, PhD and Sanjay Ranka, PhD provides infrastructure, trained personnel, consultative and collaborative expertise to analyze data from electronic medical records (EMR) and to extract meaningful information from complex biomechanical and physiological data to meet the goals of the UF OAIC. The core conducts exploratory analyses of existing epidemiological and clinical trial data to support grant development and publications.

For more information on the UF OAIC visit www.aging.ufl.edu

Who should apply? What are the evaluation criteria?

Basic science and clinical researchers who are early stage faculty or post-doctoral associates are encouraged to apply. Applicants may originate from any College within the University of Florida or the VA Medical Center, and can include collaborations with other institutions, particularly those with OAIC's.

Primary Qualifications:

1. Faculty appointment at the Assistant Professor or Post-Doctoral Associate level
2. A proposed research project relevant to enhancing late-life health and independence through interdisciplinary approaches to promote mobility and independence
3. Commitment to a research career with an aging focus
4. Not having received as PI NIH R01 or similar grant awards
5. Sufficient protected time (50-75%) to accomplish the research career development plan
6. Explicit support of Department Chair / Division Chief

Selection Process:

1. Peer review committee evaluates applicants
2. Appointment by the Pepper Center Executive Committee
3. Endorsement by External Advisory Committee
4. NIA approval

Research Component

Basic science projects and secondary data analyses projects are allowed a total amount of \$25,000 and clinical research projects which involve human subjects are allowed a total amount of \$50,000 in direct costs for the 2-year funding period. Each project should be for no more than 2 years and it is the expectation that all funds will be expended within each award year: **no carryover of funds and no indirect costs are allowed**. The research component is evaluated upon:

1. Significance, methodological approach, scientific merit and innovation
2. Relevance to the RFA theme: "Promoting Mobility and Independence"
3. Potential to result in subsequent larger NIH funded projects. A paragraph is required to describe the aims of the subsequent project and to outline how the research will provide data that are needed for the major grant.
4. Quality and Commitment of Primary Mentor and Mentoring Team
5. Multidisciplinary Investigative Team
6. Environment and use of Pepper Center Cores and other IOA Resources
7. Budget and timeline appropriateness
8. Early stage investigator qualifications (publications, impact of research, previous training, etc.).

Salary Support and Training

1. In addition to funding for the research component, salary support of up to \$50,000/year is allowable by the OAIC contingent upon support of 50-75% protected research time from the applicant's department chair and mentor
2. One or two highly qualified primary mentors actively participating in their mentoring and research education components
3. Access to a formal mentoring team (3-5 members total including primary mentor(s)) with whom the applicant meets at least every six months to monitor progress
4. A travel allowance of \$1500 is also available each year and will be funded separately through the OAIC
5. Priority access to OAIC research cores
6. Applicants must clearly lay out their career development plan including attendance of all OAIC seminars, CTSI seminars for early stage faculty, didactic scientific education through their research project and formal coursework
7. Awards levels are contingent upon the type of project proposed, availability of funds and approval by the OAIC External Advisory Board and the National Institute on Aging

ALLOWABLE COSTS

1. Only direct costs that support the advancement of the Statement of Work are allowed.
2. Funds awarded may not be used for indirect costs.
3. Awardees must comply with the broad policies governing Cost Accounting Standards.

PROVISIONS APPLICABLE TO DIRECT COSTS

1. Domestic travel is permitted for project-related scientific meetings to discuss or present research. All travel expenses to be reimbursed under this contract shall be in accordance with Florida Statutes Section 112.061. Foreign travel is not allowed.
2. Scientific equipment is allowed if specifically budgeted for and awarded. Each PI department will retain title to approved equipment purchased on their portion of the awarded budget.
3. General purpose office equipment is not allowed.
4. Food is not allowed, except for research purposes for research study participants.
5. Principal Investigator and key personnel salaries are not permitted (except the Research Education Scholar salary as outlined above), but supporting scientist and staff salaries are allowed.

When will applicants receive notification of award?

Notification of award is projected after **February/March 2023**. Funds will be distributed sometime after **April 2023**. The distribution of awards is contingent upon approval of the project from the local Institutional Review Board (IRB) or Institutional Animal Care and Use Committee (IACUC) as appropriate. **Applicants must consider the IRB/IACUC submission process in their timeline.** Facilitation of the IRB process is encouraged by speaking directly with Dr. Iafrate regarding a specific application. For IACUC approval, prior consultation with an ACS veterinarian is strongly encouraged.

What is the application process?

❖ Letter of Intent

A letter of intent to apply is due by **September 23, 2022**. The following items should be included in the letter.

1. Your name, title, email, department and college
2. Relevance to the OAIC theme described in this RFA
3. List of Core or Core's you will utilize for your project
4. Short summary, specific aims and research plan

Submit letter of intent by email to OAIC-JuniorScholarsRFA@aging.ufl.edu by 5PM on the due date.

You will receive application instructions if your letter of intent is accepted for this RFA.

PUBLICATIONS

Dissemination of the results developed under this contract are encouraged to be made publicly available and published in scholarly journals. All publications shall acknowledge that "Support was provided by the University of Florida Claude D. Pepper Older Americans Independence Center P30AG028740" and must be in PMCID compliance.

For additional information or clarification please contact Christiaan Leeuwenburgh (cleeuwen@ufl.edu), Roger Fillingim (rfilling@ufl.edu), or Rui Xiao (rxiao@ufl.edu) for questions regarding this RFA and guidance in developing relevant research proposals. Please attend the workshop if you are interested in applying.

University of Florida OAIC Pepper Center Research Education Core (REC): Opportunities & Expectations

The REC promotes the development of independent investigators in interdisciplinary research on aging relevant to the independence of older Americans. This core emphasizes the development of leadership skills for translating basic findings into clinical research and clinical findings into basic research.

The REC supports the research training of OAIC Junior Scholars. The Junior Scholars span the spectrum from no funding, to external career development awards or equivalent, to advanced trainees that have obtained grants that provide substantial salary support.

Under the direction of the REC Core leader, each Junior Scholar will assemble a mentoring committee with one primary mentor and 2-4 secondary mentors. The trainees and mentors meet regularly to discuss and strategically plan the research agenda, training and development activities and trajectory for independent funding.

The OAIC takes pride in promoting careers in the areas of Aging. Our goal is to maximize success to promote visibility of the candidates. We wish you continuing success with your career, and with this pilot project.

A. What can the Pepper Center do for Scholars?

The University of Florida REC aims are to foster the development of research and leadership skills of promising junior scientists. We support the research training of OAIC Junior Scholars that span the spectrum of scientific investigation and career levels. These include early trainees who are not yet funded independently, to advanced trainees who already have competed successfully for career development or grants that provide substantial salary support. The OAIC provides the following infrastructure and research supports for Scholars:

1. Travel, tuition/training, based on the annual budget (generally up to \$1500 annually per Scholar)
2. Statistical consulting and data management assistance
3. Other resources from the OAIC Cores, for example assistance with recruitment of research participants, access to biomedical laboratory expertise and services
4. Support of grant development, and the opportunity to have grants reviewed internally and externally
5. Networking for aging research collaborations and mentoring at UF and nationally
6. Access to competitive pilot grant funds
7. Opportunity to present project results at UF and national research forums

B. Expectations of Pepper Center Scholars.

The following provides a list of expectations for OAIC Scholars. Individualized expectations are part of formal plans and reports of each Scholar and their Mentoring Committee, partly as a function of the percentage of effort with the OAIC. All supported Scholars participate in formal mentoring groups and submit six-month progress reports from their bi-annual meetings. Appointment as a REC Scholar includes a summary of fiscal sources of support and expectations.

1. Complete progress reports & meet with the mentoring committee every six months
2. Attend at least 50% of the Institute on Aging Seminar Series. (These are also video recorded.)
3. Attend a one-hour bi-annual Round Table research meeting (Fall-Spring) where we will discuss bi-annual progress reports, funding expenditures and your next grant specific aims.
4. Present a one-hour presentation at the Institute on Aging Seminar Series.
5. Attend at least 50% of the monthly IOA/Pepper Executive Committee Meetings.
6. Present a one 5-minute presentation at the IOA/Pepper Executive Committee on their study.
7. Provide OAIC with an updated CV annually.
8. Participate in the annual IOA Research Day
9. Attend/present at the National Pepper Center Annual meeting
10. Present at one monthly National Pepper Center Leadership meeting/call.
11. Participate in other UF research events as appropriate (e.g., College of Medicine Celebration of Research)
12. Initiate new collaborations & research funding proposals aligned to the UF OAIC theme as recommended by the Mentor Committee.
13. Demonstrate scholarly productivity as set by the Mentoring Committee, generally at the rate of 1-2 first or senior peer-reviewed publications per year & collaborative publications.
14. Submit collaborative publications acknowledging UF OAIC support (Support was provided by the University of Florida Claude D. Pepper Older Americans Independence Center P30AG028740).
15. Peer-reviewed publications must be in PMCID compliance.
